ANNUAL REPORT
OF THE
BOARD OF ADMINISTRATORS OF THE CHARITY HOSPITAL,
For the Year Ending December 31st, 1893.

CHARITY HOSPITAL, }
STATE OF LOUISIANA, }
NEW ORLEANS, February 12, 1894. }

To Governor Murphy J. Foster, Ex-Officio President of the Board of Administrators, Charity Hospital, New Orleans, La.:

Governor—I beg leave to submit my annual report of the Charity Hospital. You will find annexed the reports of the House Surgeon, Finance and House Committees, together with the reports of the special departments, which embrace the entire working movement of this institution for the past year.

With the exception of a rather virulent form of the grippe, we have been exempt from any epidemic forms of diseases.

You will note, by reference to the annexed tabulated statements of the House Surgeon, an unusual variety and range of diseases in the medical, as well as in the surgical department. In the latter department, the great advance and improvements in modern surgery have obtained most favorable results, and operations which were formerly considered as hazardous and hopeless are now most successfully performed.

To the consummate skill and ability of our House Surgeon, Assistant House Surgeon and members of the general staff, we are indebted for the successful results, and some of the surgical cases have acquired national reputation.

Improvements which have been judiciously and carefully made by suitable committees during the year have added greatly

to the convenience and improved the hygienic condition of the Hospital, the most prominent of which consists of the erection of an additional story to the building known as the "Annex of 1884," which is 160 feet long by a depth of 60 feet; constructed for the use of our Trained Nurses, as dormitory and sleeping quarters. There are five double and eight single sleeping rooms, a lecture room, dining and sitting rooms, library and improved closets, together with all modern improvements. The construction of this building has been made in accordance with the most improved methods as to ventilation and light, with the view of making these quarters as pleasant and attractive as possible, as an evidence to the Trained Nurses of our earnest desire to properly care and provide for their comfort and well being.

It is intended to arrange the roof of this building as a place of resort for invalid children, thus affording a much-needed aid to their further recovery. The roof is flat, and has a high parapet wall around it, and will be further protected by iron wire screens. It contains an area of 9600 superficial square feet, and, as a roof garden, will be a most valuable adjunct to this institution.

Many other improvements have been made, of which one of great utility is the apparatus for sterilizing water and materials used in surgical operations, and also for such other purposes as they may be needed.

The Training School for Nurses is now in full and successful operation, with a regular course of studies, lectures and demonstration, and under the instruction of some of the most eminent members of the medical profession. A high standard has been established from the start of this organization in all its branches. We have applicants of the most excellent kind for all vacancies which may occur, and will have no difficulty in maintaining the full number of our Nurses.

It has been the aim and purpose of the administration, in the organization of this important branch, to make slow, but very

sure progress, and to construct a good foundation which will endure for all time.

Of the many duties devolving upon this administration, there is none of graver importance to the Hospital, as well as to the people of the State, than the successful development of our School for Trained Nurses, by which the Hospital and people are provided with skilled assistance to aid the medical man in the responsible duties of his practice.

I desire especially to commend the excellent service rendered by the Superintendent of Nurses.

After a very long and, we trust, careful consideration of the selection of the proper hospital bedstead, the committee in charge have ordered the construction of 100 bedsteads of an approved pattern, and, after a proper, practical test of them, will, if found satisfactory, order 600 more. Much time and care have been given by the committee to the selection of these bedsteads, and it is hoped that they will be of a satisfactory kind.

It is further proposed to introduce, by degrees, over the entire Hospital, iron hospital furniture and equipments of a suitable and proper kind, as experience teaches, in hospitals, that such conditions are absolutely and essentially necessary, thus giving material aid to our medical staff in combating diseases amongst our unfortunate sick.

Our present amphitheatre was constructed many years ago, when the present methods now in use in modern surgery were unknown, and the necessities of the present time require such changes being made as will aid and keep up with the great work of our surgeons, without which their efforts will be fruitless, for modern surgery demands all the most improved conditions and antiseptic appliances, and humanity and the wants of our suffering patients loudly appeal to us to supply these wants.

I would advise, therefore, that at an early date a suitable committee be appointed, with instructions, after proper and careful examination, to erect a new and modern surgical amphithe-

atre in the place of the present one, and to embrace the most improved appliances and equipments. Such a committee would have naturally to make an examination and careful study of the entire subject. Our means will not enable us to compete in the liberal expenditures made elsewhere, but we will be enabled, however, with the means at our command, to erect a suitable building, combining all the most essential requirements.

The members of the surgical staff should be on this committee, as best acquainted with the needs of such an institution; and, in conclusion, I beg to urge, as essentially proper in carrying out the high trust confided to us, that this committee be appointed at as early a date as practicable.

I again desire to urge the importance of relieving our already overcrowded wards of all diseases of a contagious or infectious character, and to urge the great necessity and grave responsibility that exists for the construction of a separate building for such diseases. The capacity of all our wards is overtaxed to such a degree that we have nightly to place a large number of the sick on the floors. It will be readily understood that such a condition is contrary to the laws of hygiene, and demands an immediate remedy. With a view, therefore, to the construction of this building, we have carefully husbanded our resources, and have sufficient funds on hand for its erection, but lack the necessary space or ground, and earnestly recommend that the State take such action as will furnish us at once with the necessary space contiguous to this Hospital, for its construction.

The Ambulance Service has continued to maintain its past high efficiency, and to render very material assistance.

Members of the visiting medical staff have rendered eminent services gratuitously, and we beg to tender to them our sincere thanks and high appreciation of their valuable services.

I beg leave to make mention of our high appreciation of the valued and skilled services of our House Surgeon, as also of the Assistant House Surgeon, and the Medical Staff and Students. The

onerous and gravely responsible duties devolving upon them have, at all times, been performed in a most admirable manner.

To our devoted and self-sacrificing Sisters of Charity, for their silent, never ceasing and untiring performance of their duties, we are most profoundly grateful.

The duties incumbent upon the officers of this institution, the Secretary and Treasurer, the Chief Engineer and Clerk have been most satisfactorily performed.

I desire to acknowledge the admirable work of the various committees, who, by judicious and economic measures, have not only been able to keep within our resources, but by careful and conservative management, to set aside the necessary funds for the erection of the contemplated buildings, their earnest desire being to save the State from any extra expenditure for these absolutely needed constructions, and which are so essentially necessary to the proper administration of this important and extensive institution.

In this annual report the Finance Committee declared the financial affairs of the institution to be in a satisfactory condition at the close of the year. The cash surplus had accumulated principally from legacies, added to advanced payments by the State on the last quarter of 1893. The income for the remainder of the fiscal year ending June 30th, 1894, will be inadequate for the regular expenditures and will cause a reduction of the surplus now reported. Such of the surplus as remains will enable the Board to carry out the works of improvement entered upon and contemplated in the near future.

Respectfully,

WM. G. VINCENT,

VICE-PRESIDENT.

Report of the Secretary and Treasurer.

CHARITY HOSPITAL,
STATE OF LOUISIANA, }
NEW ORLEANS, January 1, 1894.

To the Vice-President and Board of Administrators:

Gentlemen—I have the honor to report on the following matters:

LEASE OF THE BATTURE PROPERTY.

At date of the last annual report, the final decision of the rental basis of the lease of this property was pending in the United States Circuit Court. The decision was rendered May 25, 1893, by Judge E. C. Billings, of that court, by which it was decreed that the annual rent of the entire property for the period of twelve years from the 1st of June, 1892, should be 8 per cent. upon the sum or value of \$132,574.50. Under the terms of the decision, the interest of the Charity Hospital in this lease to the Texas and Pacific Railroad Company amounted to \$26,238.36 for the entire period of twelve years, or at the rate of \$2,186.53 per annum. The lease will terminate in the year 1904, at which time all improvements and betterments to the property will revert pro rata to the lessors. The amount of the lease is being collected semi-annually, say in January and July.

LEGACIES.

Robert Moore, Esq., a well-known and philanthropic citizen, deceased April 25th, 1893, testated to the Hospital the sum of five thousand dollars (\$5,000), which was paid June 12th, 1893, by his nephew and general legatee, Robert Moore, Jr., Esq. It was suitably acknowledged by the Board.

The will of Mr. Thomy Lafon was probated before the Civil District Court, December 27th, 1893. It leaves the large sum of thirteen thousand dollars (\$13,000), divided as follows: \$10,000 to the Hospital, \$3,000 to the Ambulance Service; the amounts to be either increased or diminished, according to the final outcome of the estate. On its receipt the Board will make proper acknowledgment of this munificent bequest.

Mr. Robert Jackson, another well-known citizen, has testated the sum of one thousand dollars (\$1,000) to the Hospital, which will be duly acknowledged when received. I annex herewith the usual tables.

Respectfully submitted,

EDWIN MARKS,
SECRETARY AND TREASURER.

Annual Report of the House Committee.

CHARITY HOSPITAL, }
STATE OF LOUISIANA, }
NEW ORLEANS, February 12, 1894. }

To the Vice-President and Board of Administrators:

Gentlemen—Your House Committee beg leave to report the following summary of improvements, etc., for the past year:

DORMITORY FOR TRAINED NURSES.

An additional or third story has been added to the Gravier street extension, containing all modern requirements in the matter of ventilation, heating, automatic closets, bathing facilities, etc. It affords proper accommodation for the corps of Trained Nurses; has large corridors, and with a Lecture Room attached, making it altogether complete for its purpose. It has been occupied since December 4, last. Total cost of erection, \$10,556.39. ✓

BLINDS FOR FRONT AND FLANK OF MAIN BUILDING.

Fourfold blinds have been placed on the inside of all the windows of the Main Building, front and flank, and add much to the comfort of the inmates by the proper regulation of the light.

EXHAUST AND CEILING FANS FOR THE KITCHEN,

run by a four-horse power engine, have much relieved that department of the intense heat consequent upon the use of the large cooking range in the summer.

A NEW STEAM PUMP,

for receiving the condensations from the steam heating appliances in the Hospital buildings, has been added during the past year.

A new hot water sterilizer has been placed in the Amphitheatre Operating Room.

An average amount has been expended for general repairs, such as painting, kalsomining, etc.

A neat wrought iron fence has been erected on the front of the Canal Street Cemetery.

THE AMBULANCE SERVICE

has been efficient. The ambulances, harness, etc., are in fair order, barring the usual wear and tear from long service. A pair of horses have been recently purchased to replace others worn out.

WORK IN PROGRESS.

A contract has been entered into for iron bedsteads, the first installment of which will be received in a few weeks. The committee believe they have secured an excellent bed at a low figure. Corrugated rubber matting has been ordered for the first floor of the Main Building, which, if it proves satisfactory, will be used through the entire Hospital where needed.

A serious explosion occurred at the Mississippi Valley R. R. depot on October 24, 1893. It is mentioned in this report on account of its close proximity to the Hospital, and additionally for the very important reason that there appear to be no safeguards surrounding the carriage and deposit of dangerous explosives, or warning conveyed of their presence. Fortunately but slight damage was caused to the Hospital in this instance, but it might have resulted more seriously. The attention of the General Assembly is directed to this matter, with a view to the public safety.

Respectfully submitted,

A. R. BROUSSEAU,
JOHN T. GIBBONS.

Annual Report of the Finance Committee.

CHARITY HOSPITAL, }
STATE OF LOUISIANA, }
NEW ORLEANS, February 12, 1894. }

To the Vice-President and Board of Administrators :

Gentlemen—Your Finance Committee beg leave to report that the financial affairs at the Hospital are in a satisfactory condition at the close of the year.

The cash surplus reported has accumulated principally from legacies, added to advanced payments by the State on the last quarter of the year 1893.

The income to be received from the State for the remainder of the fiscal year ending June 30, 1894, will be inadequate for the regular expenditures, and will cause a reduction of the surplus now reported; such of the surplus as remains will enable the Board to carry out the works of improvement entered upon, and contemplated in the near future.

Respectfully submitted,

G. W. SENTELL,
GEO. SEEMAN,
JOS. A. SHAKSPEARE.

End for the sick children and old people of the Hospital.

Annual Report of the House Surgeon.

CHARITY HOSPITAL,)
STATE OF LOUISIANA,)
NEW ORLEANS, February 12, 1894.)

To the Board of Administrators:

Gentlemen—The records of the Medical Department of the Hospital, briefly summarizing the work of the year, are herewith respectfully submitted:

At the last annual report, 713 patients remained under treatment; during the year 8330 new patients were admitted, making a total of 9043 inmates treated; white, 5670; colored, 3373. The daily average of patients during the year was 605.

For statistical details we beg to refer to the report of the Clerk, compiled with perfect precision and containing all the tableaux required by the statutes, and to the annual reports of the special departments, all herewith presented.

The number of admissions, which has gradually increased since 1887, is the largest since 1866. The prevalence of La Grippe accounts, in part, for this increase, while much of it is due to the extending reputation of this charity and the increasing facilities for giving medical relief to the poor.

There has been an increase in the number of patients treated in all the special departments. In the Maternity Department 235 children were born, which is the largest number ever reported. There were 229 children under 10 years of age admitted during the year. We respectfully recommend that the children's wards be supplied with improved orthopedic apparatus, and such special appliances as may add to the comfort of sick children, or

improve the means for treating the crippled and deformed. The cost for converting the top of the Annex into a roof-garden or playground for children would be inconsiderable compared with the benefits to be derived.

In the Department of Nervous Diseases the service would be improved by other facilities for lifting and handling patients and providing better means for their recreation.

In the Outdoor Clinics 21,205 cases were treated, and to them 50,909 consultations were given. In addition should be added 2055 cases of minor surgery, attended, out of clinic hours, in the Surgical Amphitheatre. The new Clinic Buildings continue to meet the demands of the Outdoor Department, offering facilities in their various divisions for the treatment of all diseases, medical, surgical and special, occurring in men, women and children, white and colored.

The efficiency of the Ambulance Service has been well maintained during the year. The corps responded to 1465 calls, tabulated in the subjoined report, which shows the practical usefulness of this arm of the Medical Department. The springbeds in all the ambulances should be renewed and improved. No means should be spared in keeping this department in a state of perfect equipment.

The Hospital Pharmacy has been thoroughly renovated during the year; new bottles and jars have been supplied, and the system of labeling ward prescriptions has been simplified and improved.

The Charity Hospital Training School is now permanently organized and in operation. To the gentlemen composing the Corps of Instructors not connected with the Resident Staff, thanks are due for their earnest co-operation. The successful organization of the school is due, in very great measure, to the competency and zeal of Miss Agnes O'Donnell, the Superintendent of Nurses. The nurses are domiciled in the Annex, in the additional story added for their use, but it must be known that this is only a tem-

porary provision. Suitable accommodations can only be provided in a separate home for the nurses. ✓

We have taken the liberty of authorizing the purchase of such apparatus and material as may be necessary in the course of instruction for the nurses ; for instance, a microscope and attachments, appliances for analysis in medical chemistry, apothecary's scales, a cabinet of materia medica, etc. This Training School should be fostered and encouraged in every possible way.

The trained nurses are engaged at present only in the Female Department. It is contemplated by Sister Agnes, as early as practicable, to introduce trained nurses in all the wards of the Hospital. In this connection the advisability of a Training School for Male Nurses is being carefully considered.

Since the recent munificent donations to the Hospital, the way is now clearer for certain improvements which have been so long contemplated. If you will allow the expression of the thought, we respectfully urge that it was clearly the purpose of these benefactors to furnish the means of enhancing the facilities for charitable work and not for the purpose of replacing legislative appropriations. The wishes of the donors, in our judgment, would be well carried out by an expenditure of their donations in the directions indicated, as follows:

1. REFURNISHING THE WARDS OF THE HOSPITAL.

The following articles are especially desirable: Iron bedsteads throughout the Hospital as early as practicable.

One metal framed, glass-top table for each bed.

An antiseptic case or cabinet for holding medicines or surgical dressings in each ward. Plans and specifications for these cases are ready for presentation.

Sterilizing vessels in connection with a system of sterilizers now in course of construction by the Chief Engineer.

Improved utensils for domestic and medical purposes in all the wards.

The substitution of rubber matting throughout the buildings for all materials made of cotton or wool.

2. EXTENSION OF THE HOSPITAL GROUNDS FOR SPECIAL PURPOSES.

The Hospital should be provided with reception rooms and accident wards for the admission of patients at night, and for the temporary care of those admitted in a moribund state.

Wards are required for the separate treatment of contagious and infectious diseases. To the importance of this matter your attention is specially directed.

Better accommodations for delirious patients and those acutely maniacal are necessary for their proper care.

3. THE CONSTRUCTION OF NEW SURGICAL OPERATING ROOMS.

In our last annual report we urged the necessity of constructing a suite of surgical operating rooms and an amphitheatre of modern pattern and equipment, in accordance with the requirements of the advanced surgery of the day. We now desire to emphasize this necessity. Much has been accomplished of late years in diminishing the death rate of capital surgical operations, and more can be done in this direction by constructing rooms properly equipped for the modern surgical technique and suitably arranged for all general and special surgical work. In connection with this subject, we desire to recommend a system of hot water and vapor baths, which can very well be arranged in a part of the surgical building. The plans for this new surgical building are now clearly in mind, and we respectfully suggest that a committee be appointed to consider the necessity of this improvement and all other matters connected therewith.

The best means of preserving the medical archives of the Hospital has long been a subject for consideration. We beg again to direct attention to this matter. The publication of a *Charity Hospital Bulletin*, as a medical periodical, would probably assist in the right direction, if arrangements could be perfected for issuing such a periodical without any financial risk to the Hospital. This matter is simply suggested for consideration.

Grateful acknowledgments are due the Visiting Staff for their

important and gratuitous services during the year. The able co-operation of the Assistant House Surgeon, Dr. J. D. Bloom, we desire especially to acknowledge and commend.

The assistance rendered in the work of the year by the Sisters of Charity deserves the most grateful recognition. The death of Sister Frances, on the 14th of December, after serving the Hospital for forty years, was the occasion of profound sorrow to all who knew this gentle, good woman. Sisters of Charity attend the lectures delivered to the nurses of the Training School, and to their gentle ministrations will be added the efficiency of educated nurses.

In conclusion, we respectfully request the appointment of special committees, vested with the authority of considering the recommendations herein submitted and reporting, in due time, to your honorable body the results of their deliberations.

Respectfully submitted,

ALBERT B. MILES,
HOUSE SURGEON.

Pathological Department.

CHARITY HOSPITAL, }
STATE OF LOUISIANA, }
NEW ORLEANS, February 1, 1894.

To the Honorable Board of Administrators of the Charity Hospital :

Gentlemen—I beg leave to report that the following work has been done during the year 1893 in the Pathological Department :

REPORT OF AMPHITHEATRE SERVICE FOR 1893.

	Outdoor Patients Patients. Adm'td	
January.....	139	23
February.....	134	19
March.....	149	21
April.....	143	20
May.....	176	27
June.....	163	19
July.....	167	19
August.....	186	24
September.....	208	29
October.....	187	18
November.....	175	27
December.....	228	23
Total.....	2,055	269
Grand total.....		2,324

This report includes many cases of minor surgery, belonging to the Outdoor Department, received and attended out of the clinic hours, and also many of the ambulance patients, some of whom were treated as outdoor patients, while others, as shown in the column on the right, were admitted into the Hospital.

SUMMARY OF OBSTETRIC CASES, 1893.

There were 235 cases of Obstetrics.

White.....	130.	Multiparae.....	92
Colored.....	105.	Primiparae.....	143

PRESENTATIONS.

POSITIONS.

MANNER OF DELIVERY

Naturally	210
By Forceps.....	16
By Manual Traction	7
Spontaneous Version.....	1
Symphysiotomy	1

MORTALITY OF MOTHERS.

Of the 235 cases 4 mothers died, making a mortality of one and two-thirds per cent.

CAUSES OF DEATH.

Puerperal Septicæmia.....	2
Phlebitis (Pudendal). Pneumonitis.....	1
General Miliary Tuberculosis.....	1

The number of children born were 235.

Male.....119	Living.....	211
Female.....116	Still-born.....	24

Most of the still-born children were delivered before the seventh month.
